- NMMS Constitution and By-Laws Proposed Amendments and Draft Policy

At the January Council, NMMS President William Ritchie MD reported the ad hoc committee on reorganization of the House of Delegates continues to meet and work in tandem with the Constitution and Bylaws Committee as they finalize amendments to restructure the organization. Subsequently, the committees have conferred several times and, with unanimous support, offer the proposed amendments included as an insert in this issue. The amendments will also be emailed via “Your Voice For Medicine” and posted to the Society website http://nmms.org. [If you have not yet received a YVFM email and would like to, please send a request with your email address to info@nmms.org]. Please send all questions and feedback to Randy Marshall at marshall@nmms.org and to the councilors of your component society [listed at http://nmms.org]. The amendments will be voted on at the House of Delegates meeting May 19-20.

The Council endorsed the election of both Barbara McAneny MD for President of the American Medical Association and Albert Kwan MD for the AMA Council on Medical Education. The election will be held at the annual meeting in Chicago, June 10-14.

John Anderson reviewed the current economic shortfall of New Mexico and possible initiatives to increase revenues. He discussed the legislative interest in repealing deductions and credits on Gross Receipts Tax paid on medical services and moving to a flat tax that all health care providers would pay. Replacing a system that taxes some providers at varying rates and shelters others from any tax at all with a broad based tax of 2% on all licensed facilities and medical providers would eliminate the disparity in GRT assessed to different provider types, simplify a physician’s tax filing, and increase the Medicaid budget by leveraging 3 to 1 federal matching funds.

Some of the 2017 legislative issues for the 60-day session (January 17 - March 18) include:

1. **SB145 - Scope of Practice Act** would establish an interim legislative committee and deliberative process to study all expanded practice initiatives prior to introduction of legislation.

2. **SB90 - Prescribing psychologists** want to change supervision requirements and expand privileges.

**Council News** ...continued on page 3
Candidates for Election

Each year the NMMS House of Delegates elects officers to lead the Society. The physicians below were selected by the NMMS Nominating Committee to run for the 2017-2018 vacancies. Campaign speeches will be given at the first House of Delegates on Friday morning, May 19th, and voting will take place at the second House of Delegates on Saturday morning, May 20th.

Vice President:

Nancy Wright MD
Employed, Full time, Pediatrics

I am grateful to be considered for the office of vice president by the nominating committee of the New Mexico Medical Society. I have lived in New Mexico since moving to Las Vegas in 2002, straight out of my pediatrics residency at the Medical College of Georgia. I practice medicine full time, initially in private practice, and am currently an employed physician. I have been the councilor to the medical society from San Miguel county since 2009 and also been active in multiple committees in my community. Although the future of medicine may appear unclear in our changing political and technological climate, it is essential to continue to maintain the highest standards of our profession to ensure the best for our patients. I hope I will have your support.

Vice Speaker, House of Delegates:

Dion Gallant MD
Employed, Full time, Family Medicine

Thank you for the nomination for Vice Speaker to the New Mexico Medical Society’s House of Delegates. I am a family physician in practice with Presbyterian Medical Group. I have been in practice in Albuquerque for 15 years since completing medical school and residency at UNMH. I currently split my time between clinical practice at Kaseman Family Healthcare and serving as the medical director for primary care at Presbyterian Medical Group. I am a past president of GAMA as well as a past president of the NM chapter of the AAFP. I continue to serve the NMAAFP as a delegate to the AAFP Congress of Delegates. It would be an honor to serve the NMMS as Vice Speaker for the House of Delegates.

Speaker, House of Delegates:

Angela Bratton MD
Private Practice, Full time, Ophthalmology

Thank you for the nomination to continue as speaker of the House of Delegates. It has been an honor to serve in this position for the past two terms. Previously, I have represented Los Alamos and Rio Arriba Counties on the Council and have served on various NMMS committees. I have been in private practice in New Mexico for 23 years. This year, the House of Delegates will consider proposed changes to streamline our annual meetings. If re-elected, it would be my privilege to assist with any transitions necessary to further the will of the members of the New Mexico Medical Society.

Delegate to AMA:

Steve Kanig MD
Employed, Part time, Administrative, Non-Medical

It is an enormous privilege to represent New Mexico as one of your AMA Delegates. During my years at the AMA, I have developed a reputation as a well informed and articulate leader, respected for the dozens of resolutions that I’ve authored and advocated for successfully, resulting in new policy, directives for action, and reports of national importance. As your Delegation Chair, I am playing an important role in the merger of two western conferences that will give New Mexico an
Election ...continued from page 2

...Continued... from The New Mexico Medical Society News...

...continued from page 1

3. HB364 - Optometrists want to prohibit eye examinations and lens prescribing through telemedicine.
4. HB215 - Physician Assistants want to change the definition of profession and move from supervision by physicians to a collaborative practice with the health care team.
5. SB150 - Chiropractic profession wants to change definition to chiropractic medicine and add two categories of certified advanced practice chiropractic physicians which would be allowed to prescribe, administer, inject and dispense dangerous drugs other than Schedule 1 of the Controlled Substance Act.
6. SB82 - Amend the Non-Compete Act to prohibit employers from placing provisions in their employee contracts which allow out of state operations as the legally-binding venue. New Mexico would be the venue on all non-compete contracts for health care providers.
7. SB152 - Amend the Medical Practice Act to allow the NMMB to establish a special licensure fee of $100 to be used for loan forgiveness for physicians practicing in rural areas to help recruit and retain physicians to New Mexico.
8. HB11 - Mandate health insurance benefits to cover the cost of coronary artery calcium scans for atherosclerosis screening.
9. HB260, SB180 - Expand the definition of "biological product" to include biosimilars and enable pharmacists to substitute them for brand name biologic medicines.
10. HB228, HB263 - Allow terminally-ill patients access to investigational treatments that have passed basic safety testing (Phase I) with the FDA, but are not yet available on pharmacy shelves.
11. HB171 - Allow physician-assisted suicide.
12. SB319 - Prohibit sale of E-cigarettes to anyone under the age of 21.
13. HB313 - Allow provider and carrier to negotiate reimbursement rate for "surprise bills" for health care services received out of network for non-emergency treatment.

Legislative updates are sent weekly to membership via "Your Voice For Medicine" and are posted online at www.nmms.org.

As reported in October, NMMS was awarded a grant from the AMA Scope of Practice Partnership which was used to develop a media campaign that includes a website, broadcast advertising, and targeted online digital advertising for Scope of Practice issues at the legislature. The response to the tv ads, digital marketing, and requests for action via "Your Voice For Medicine" has been phenomenal and really made an impact on legislators and improved their understanding of the complexity and urgency surrounding bills impacting Medicine in the state. Thank you for your ongoing support and participation.

Full council Minutes are posted on line at www.nmms.org and by request from info@nmms.org.

Young Physician Section, AMA:

Jose Avitia MD
Employed, Full time, Oncology

It has been an honor to serve as the Young Physician Delegate for the AMA for 2016. It would be a privilege to continue to be a voice for the many issues that impact healthcare in our state and country. I have learned of the importance of the role of physicians in shaping policy in the YPS/NMMS. As a practicing oncologist in urban and rural communities I will continue to advocate for the unique needs of patients and physicians in these areas. In this ever-changing climate of policy changes in healthcare, I want to contribute to the solutions for patients and providers. It has been a humbling learning experience in my first year in the YPS/NMMS and hope to continue my growth in organized medicine at the local and national level for years to come.

Question Corral

Member phone calls to the office provide insight to the hot issues affecting medical practices in New Mexico. This venue will be used to air the answers (or at least the latest news) on member questions. If you have your own question you’d like addressed, please email Annie Jung at ajung@nmms.org or give her a call at the office (505) 796-3433.

Q: Can pharmacists prescribe in NM? If so, what?
A: Pharmacists in NM can prescribe under Pharmacy Board protocols that have been allowed by law and specific rules. In New Mexico, pharmacists can become certified to:
• Administer vaccinations to individuals of all ages.
• Perform tuberculosis skin testing.
• Prescribe medications for emergency contraception and tobacco cessation as well as naloxone to treat opiate overdoses.
• Prescribe hormonal contraceptives (approved by Medical Board in November 2016. Pharmacy board will adopt the final rule. NMMS took a neutral position, having received comments pro and con equally on the expanded ability to prescribe.)

Each year, UNM has a “Certification Day” in which fourth-year PharmD students can participate in training programs to become certified in any of the above activities.

Pharmacist Clinicians: New Mexico is one of only four states in which pharmacists with advanced training have prescriptive authority under collaborative drug management protocols. Since 1993, the state of New Mexico has recognized advanced pharmacist providers, known as pharmacist clinicians. Based on state statute and regulations, pharmacists seeking to become pharmacist clinicians in New Mexico must provide proof of completion of 60 hours of board approved physical assessment course work followed by a 150-hour, 300-patient-contact preceptorship supervised by a physician or other practitioner with prescriptive authority.

The scope of practice for the Clinical pharmacist sets forth: “Pharmacist clinician” means a pharmacist with additional training required by regulations adopted by the board in consultation with the New Mexico medical board and the New Mexico academy of physician assistants, who exercises prescriptive authority in accordance with guidelines or protocol.

Rules for pharmacist prescribing: http://164.64.110.239/nmac-parts/title16/16.019.0026.htm

The Medical Board has adopted rules regarding the supervising physician’s role: http://www.nmmb.state.nm.us/docs/rules/NMAC16.10.11_PharacistClinicians.pdf

Q: Why are Medicaid payers in NM no longer willing to pay for nurse advice calls to the Nurse Advice Line? The different centennial programs and straight Medicaid had paid for this service in the past, but will no longer be paying for the service after 12/31/2016. Because of NM Medicaid payers no longer supporting this service, the NM Nurse advice line can no longer pay for itself and will no longer be available to the Medicaid patients in our state. This puts the burden of taking all after hour calls on the physicians to either take the calls themselves or pay for another nurse advice service.

A: Two of the 4 the Medicaid MCOs participated with the NM NAL prior to Centennial Care. Centennial Care required each MCO to have a NAL but did not mandate contracting with the NM NAL since some of the MCOs leverage their national NALs. It makes better sense for the MCOs to have internal NALs since they are able to immediately access patient records while on the phone and better coordinate care and referrals. The MCOs continue to pay NM NAL per member when members call the NM NAL instead of their internal NALs, but that isn’t going to sustain them. NMHSD has encouraged the NM NAL to diversify and seek other funding streams such as hospitals, after hour physicians, etc. HSD will not mandate that the MCOs contract with NM NAL. Medicaid financing must be tied back to a member-so Medicaid has been contributing its fair share for calls when attributed to a Medicaid member.
